EXPERIENCE

February 2021 - June 2024
Web Developer Automatez | Ponda

- Developed web applications using HTML, CSS, JavaScript, and jQuery.
- Implemented responsive design techniques to ensure optimal viewing experience across multiple devices.
- Designed websites, portals, and large-scale web applications for multiple clients.
- Optimized website load times and performance using techniques such as minification and content delivery networks (CDNs).
- Created and implemented firewalls, encryption strategies, and other critical security measures.
- Collaborated with other developers on software design and architecture decisions.
- Built layouts according to customer parameters using HTML5 and CSS3.
- Analyzed user feedback and website analytics to guide the continuous improvement of web applications.

EDUCATION AND TRAINING

October 2020
Bachelor of Computer Applications
Dnyanprassarak Mandals College & Research Center, Mapusa, Goa, India

PROJECT

Music Academy Website
- Students can Register for a course online
- Implemented online fee payment method
- Implemented a section where students could get notes and information about exams

MY ROLE IN PROJECT
- Conducting analysis of website and application requirements.
- Writing back-end code and building efficient PHP modules.
- Developing back-end portals with an optimized database.
- Troubleshooting application and code issues.
- Responding to integration requests from front-end developers.
- Finalizing back-end features and testing.
- Updating and altering application features to enhance performance.
